

WristPC Strap Installation Instructions

1. Remove adhesive cover from Velcro strip and attach to the back of the keyboard.

2. Pull top straps up through the top loops of the keyboard, from back to front, and loop around a shown in picture on right.

3. Wrap the straps around the bottom side of the wrist and insert the straps through the bottom side of the keyboard, from back to front. Loop the straps around and attach snugly using the Velcro on the straps. It should look similar to picture below.

4. Two elastic Velcro strips are provide to attach the cord to the arm. Installing one strap around the forearm and the other around the biceps should secure the cord.
